

COMPANY OVERVIEW

Established in the 1980's within the UK's Sir Robert McAlpine engineering and construction group, today, RES (Renewable Energy Systems) is the world's largest independent renewable energy company, with the expertise to develop, construct and operate projects around the globe. Headquartered in the UK, we operate globally with offices in 10 countries across the Americas, Europe and Asia Pacific.

We've delivered over 18GW of renewable generation for nearly 40 years.

SERVICES

DEVELOPMENT

We can manage the entire development process - from initial site selection to consent.

CONSTRUCTION

Our engineering, procurement, and construction teams seamlessly and safely co-ordinate projects of outstanding quality.

OPERATIONS

Providing comprehensive asset management and O&M services to maximise our clients' assets and optimise asset value.

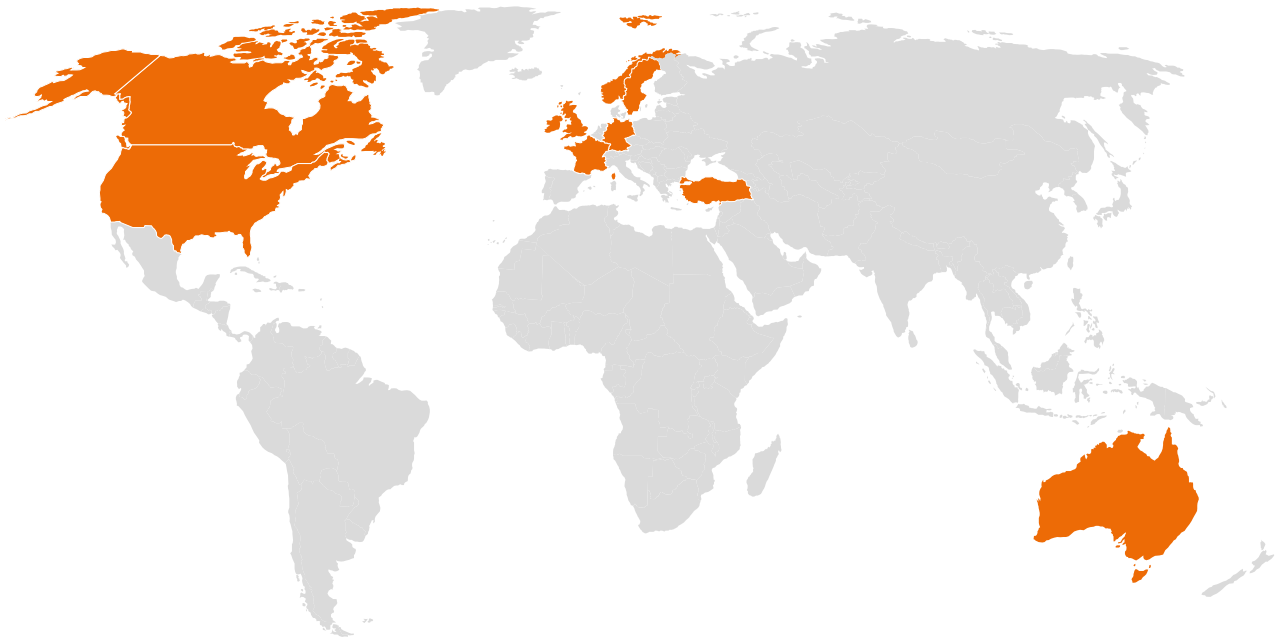

Our customers benefit from our unrivalled experience in a wide variety of services across our core generation and enabling technologies. Our experience is as vast as it is valuable, having delivered over 18GW of renewable generation for nearly 40 years.

We provide large scale renewable energy, energy storage and transmission projects for utility, commercial and industrial partners.

As early pioneers of wind turbine technology, we are proud to have been innovators in the development of the global renewable energy market.

Our vision is a future where everyone has access to affordable zero carbon energy.
